PROJECTS

- **ElectroMart- eCommerce Website** (github.com/santos021/ElectroMart)
 - The primary goal of this project was to develop an electronics-focused eCommerce website named ElectroMart.
 - The website was developed using HTML, CSS, Bootstrap, and JavaScript for the frontend, while the backend was implemented using Java Spring Boot, Spring Data JPA, and Spring Security. MySQL was used for database management.
 - Key features include secure user registration and login, product browsing by categories, order placement, and order tracking for users. The admin panel provides functionality to manage products, categories, users, and order statuses through a dedicated dashboard.
- **Personal Portfolio** (santosbiswal.netlify.app)
 - Developed a responsive personal portfolio website to showcase my skills, experience, and project.
 - Designed with HTML, CSS, and JavaScript, incorporating a responsive and visually appealing layout.
 - Integrated contact information and social media links for easy connection, with an option to download my CV.
